### **DETAILED ACTION**

## Specification

1. The disclosure is objected to because of the following informalities: Paragraph 5, line 13 contains the abbreviation CC. This should be written out before being used as an abbreviation. Paragraph 5, line 14 contains the word "phenomena". It appears this should be "phenomenon". Paragraph 6, the written description of Equation 2 should identify V<sub>DC</sub> as the system voltage. Paragraph 6, the first line of the written description of Equation 3 contains the phrase "system voltage (e.g. V<sub>CC</sub>)". It appears this should be "system voltage (e.g. V<sub>DC</sub>)". Paragraph 7, line 3 contains the phrase "using small formfactor multi layer ceramic capacitors (MLCC's)". It appears this should read "connecting a small form-factor multi-layer ceramic capacitor (MLCC)". Paragraph 7, line 4 contains the phrase "MLCCs 22 have". It appears this should be "the MLCC 22 has". Paragraph 7, line 6 contains the phrase "MLCC's 22 have". It appears this should be "the MLCC 22 has". Paragraph 7, line 6 contains the phrase "unfortunately have". It appears this should be "unfortunately has". Paragraph 7, line 7 contains the phrase "using MLCC's 22". It appears this should be "using an MLCC 22". Paragraph 7, line 9 contains the phrase "for MLCCs 22". It appears this should be "for the MLCC 22". Paragraph 20, lines 7-8 contain the phrase "circuit to 36". It appears this should be "circuit 36".

A legend such as "the same reference characters refer to the same parts throughout the specification" should be placed at the beginning of the written description of Figure 3.

Appropriate correction is required.

Application/Control Number: 10/735,674 Page 3

Art Unit: 2836

## **Drawings**

- 2. The drawings are objected to as failing to comply with 37 CFR 1.84(p)(5) because they do not include the following reference sign(s) mentioned in the description: V<sub>ESR</sub> and I<sub>L</sub> in Figure 1 (see paragraph 6, equation 4 and paragraph 7, line 8; and 46a in Figures 4A and 4B (see paragraph 21, lines 10 and 14, and paragraph 22, line 2).
- 3. The drawings are objected to as failing to comply with 37 CFR 1.84(p)(5) because they include the following reference character(s) not mentioned in the description: (t,30%) in Figures 2 and 5; SURGE in Figures 4A and 4B; and 84 in Figure 8. Corrected drawing sheets in compliance with 37 CFR 1.121(d), or amendment to the specification to add the reference character(s) in the description in compliance with 37 CFR 1.121(b) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. Each drawing sheet submitted after the filing date of an application must be labeled in the top margin as either "Replacement Sheet" or "New Sheet" pursuant to 37 CFR 1.121(d). If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

# Claim Objections

4. Claims 17, 22, and 27 are objected to because of the following informalities:

Claim 17 line 5, the phrase "the surge indicator" lacks proper antecedent basis. It

Application/Control Number: 10/735,674 Page 4

Art Unit: 2836

appears this should be "the surge inductor". Claim 22, line 4 contains the phrase "ramp down rate;". It appears this should be "ramp down rate; and". Claim 27, line 11 contains the phrase "of the comparator;". It appears this should be "of the comparator; and". Appropriate correction is required.

## Double Patenting

5. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. A nonstatutory obviousness-type double patenting rejection is appropriate where the conflicting claims are not identical, but at least one examined application claim is not patentably distinct from the reference claim(s) because the examined application claim is either anticipated by, or would have been obvious over, the reference claim(s). See, e.g., *In re Berg*, 140 F.3d 1428, 46 USPQ2d 1226 (Fed. Cir. 1998); *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) or 1.321(d) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent either is shown to be commonly owned with this application, or claims an invention made as a result of activities undertaken within the scope of a joint research agreement.

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

6. Claims 1-30 are provisionally rejected on the ground of nonstatutory obviousness-type double patenting as being unpatentable over claims 1-30 of copending Application No. 10/331,944. Although the conflicting claims are not identical, they are not patentably distinct from each other because the only differences are that Application No. 10/331,944 claims a circuit, which reads on an integrated circuit, and a

Art Unit: 2836

controller circuit, which as claimed functions as a voltage regulator. A Notice of Allowance of claims 1-30 of Application No. 10/331,944 was mailed on May 18, 2006.

This is a <u>provisional</u> obviousness-type double patenting rejection because the conflicting claims have not in fact been patented.

#### Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Hal I. Kaplan whose telephone number is 571-272-8587. The examiner can normally be reached on M-F 8:30-5:00.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Brian Sircus can be reached on 571-272-2800 x36. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free). If you would like assistance from a USPTO Customer Service Representative or access to the automated information system, call 800-786-9199 (IN USA OR CANADA) or 571-272-1000.
